

Stella Fantasy is...

Stella Fantasy is a high-quality Web3 ARPG built on Binance Smart Chain. The players can conquer Abyss Rifts, gather resources, craft gear, and battle in an Anime-inspired world. And the game offers intriguing features where players can trade their characters and weapons on the Marketplace or use them to tackle more challenging content, earning better rewards in return. In order to maintain the game's ecosystem and governance, Stella Fantasy Token (SFTY) has been issued and this token plays a crucial role in awakening and crafting NFTs and purchasing high-grade items.

What Makes Stella Fantasy Different

Stella Fantasy was created so that you could experience state-of-the-art battles with a 4-person party, enjoy high-quality graphics of beautiful characters, as well as smooth mechanics created with Unreal Engine 4.

1. 3D character modeling that best resembles anime illustration visuals
 - Stella Fantasy provides 3D character modelings that show almost exact resemblance to their original anime illustrations' visuals, which will not disappoint users.
2. Character shaders that make the In-Game Character feel real
 - Stella Fantasy delivers a true sense of 'playing an anime' through advanced shader technologies. Users can see shadows of the characters around the environment as they move, making it feel more realistic within the in-game world.

3. Character Action shows Individuality

- Each character is unique as they have their own combat style, weapon, and skills that they use in battle.
- Characters are given non-fungible value as they all have different animation frames respectively, allowing them to have their own motions, performances, and weapons.

4. Stella Fantasy's Unique Action Experience

- Engage in a non-target combat with a party of 4 on-field characters against many enemies.
- Users control up to 4 characters in real time. avoiding monster attacks and competing for extreme play, similar to a console game

5. Multi-playable Content

- Achieve higher ranks when facing powerful invaders from the Abyss. Rewards vary based on your rank. Challenge the Abyss Invader, in which Users will compete for a higher rank and more rewards.
- Visit the Stellaverse, a place where Users are free to chat, play minigames, and interact with each other

Pursuing collaborative growth with players through NFTs of in-game features

Players will begin with 3 characters and their own Frontier Town. As they expand their town, players can earn Manarings, the in-game currency. By using Manarings to clear "Abyss Rift" stages, Boss Raid content, and other missions and battles, players can obtain SFTY Tokens and other items. Players can strengthen items/gear that players received or use SFTY tokens in Stella Fantasy's own marketplace to obtain new characters or engage in activities such as staking to increase the value of their assets.
